## RELEVANT PROJECTS

### JavaScript Full Stack App:

- To be added when done

### Java Full Stack App:

- To be added when done

### Allerg.ly:

- Python based food collector and sorter for people with food allergies
- Utilized PostgreSQL databases to store and access data. Used Flask & RESTful routes for the frontend.
- The app follows CRUD & MVC principles.

### RESTful API:

- Designed and implemented a RESTful API using Express.js, MongoDB, Mongoose, and JSON Web Tokens (JWT) that enabled data transmission and communication between the client and server.
- Created API endpoints for CRUD operations, authentication, and authorization, ensuring that the API adheres to industry standards and best practices.
- Followed Agile methodologies for software development and employed Git for version control, ensuring that the API's codebase is organized, structured, and easy to maintain.

## PROFESSIONAL EXPERIENCE

**Lacasacontinua Corp**  
**USA**

**Miami,**

*Marketing & Export Assistant Manager*  
*Now*

*Aug 2021 –*
